

# How to Fold a Paper Airplane

Group XXDF

October 11, 2017

## Introduction:

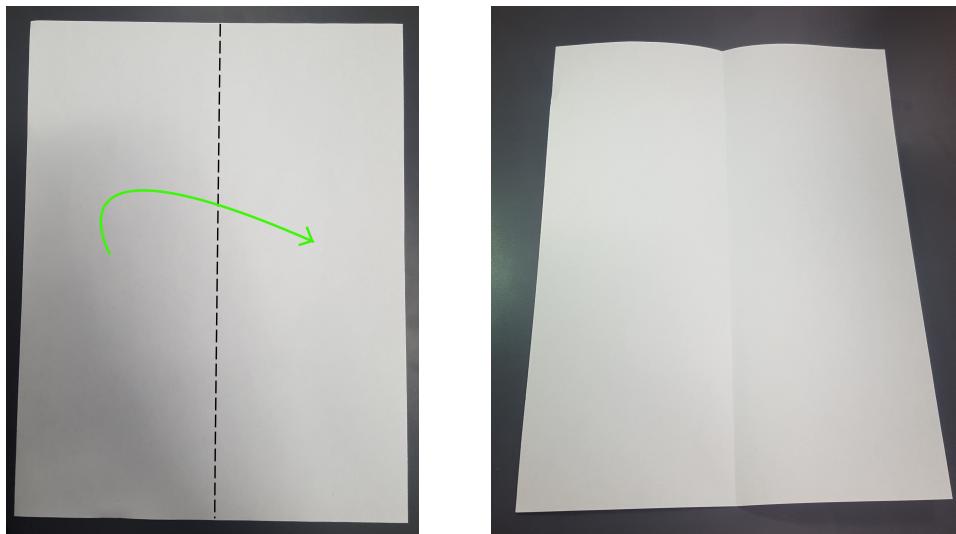

Have you ever wanted to send super secret messages across the classroom or lecture hall that no one else was allowed to read? Well, with our patented stealth paper plane design you can<sup>1</sup>! Watch as your stealth plane soars across the skies of your lecture hall.

## Materials:

- One sheet of  $8\frac{1}{2}'' \times 11''$  paper
- Colored pencils (optional)

## Instructions:

Figure 1: Fold the paper in half vertically (hotdog style).

---

<sup>1</sup>Paper airplane is in no way stealthy and will not actually hide your secret messages. If you throw this plane in a lecture hall or classroom your instructor will see it, and will confiscate it. No patent exists for paper airplane design.
