

How to Fold a Paper Airplane

Group XXDF

October 10, 2017

Introduction:

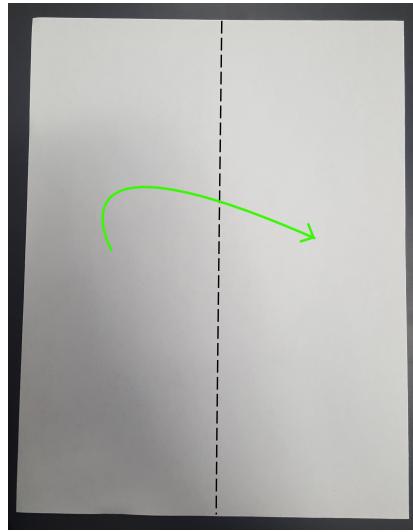

Have you ever wanted to send super secret messages across the classroom or lecture hall that no one else was allowed to read? Well, with our patented stealth paper plane design you can¹! Watch as your stealth plane soars across the skies of your lecture hall.

Materials:

One sheet of $8\frac{1}{2}'' \times 11''$ paper
Colored pencils (optional)

Instructions:

Figure 1: Fold the paper in half vertically (hotdog style).

¹Paper airplane is in no way stealthy and will not actually hide your secret messages. If you throw this plane in a lecture hall or classroom your instructor will see it, and will confiscate it. No patent exists for paper airplane design.
